

Yuvaraj T

Software Engineer — Healthcare Software, CI/CD & Test Automation

Chennai, India 600057 | +91 95511 38588 | uv.yuvaraj21@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Software Engineer with 3+ years building healthcare software at ICU Medical, where the code ships inside clinical infusion systems. I own CI execution for Plum Duo and Plum Solo releases, build test automation frameworks and engineering tools, and develop full-stack apps with React, React Native, Python, FastAPI and Django. Recipient of the ICU Achiever Award. Open to Senior Software Engineer roles.

EXPERIENCE

Software Engineer — ICU Medical LLP, Chennai

Aug 2022 – Present

- Built and maintain Jenkins CI environments for medical infusion pump software, improving build speed and execution reliability.
- Own CI execution across multiple Plum Duo and Plum Solo releases: formal, regression, patch and dry-run runs.
- Lead CI failure analysis with engineering and verification teams to keep release runs on schedule.
- Built and extended automated test frameworks and validation tools in Python and Ruby, integrated with TestRail and HDF5 data.
- Contributed to LifeShield Infusion Safety Software, developing validation tools and automation.
- Built Inventora, a full-stack inventory system (React, FastAPI, MongoDB) for tracking medical devices, which improved operational efficiency.
- Took managerial responsibility for a medical visualization prototype integrating Zygote Body 3D anatomy.

Site Reliability Engineer (Intern) — NortonLifeLock, Chennai

Jan 2022 – Jun 2022

- Automated system monitoring for the Consumer Tech Ops team, improving operational processes and service reliability.
- Supported performance optimization tasks and incident response.

Front-End Developer (Intern) — Encomece, India

Jul 2021 – Aug 2021

- Developed and optimized React.js components, improving UI responsiveness and user experience.
- Implemented new features and streamlined front-end workflows with the development team.

SELECTED PROJECTS

Inventora — Inventory Management System | React, FastAPI, MongoDB, JWT, PrimeReact

Tracks infusers, accessories and servers with role-based access, manager/admin dashboards, approval workflows, notifications and consolidated reporting.

TestRail Failure Analysis Dashboard | React, FastAPI, Python, TestRail API

Analyses test runs by run ID, categorizes failures and manages assignments through inline-editable tables and status dashboards.

CI Automation and Test Framework Engineering | Python, Ruby, Jenkins, HDF5, TestRail, NeuronFramework

CI environment setup, automated execution workflows, result analysis and reporting integration for infusion pump software.

PurpleBooks — E-commerce App | React Native, Operations

Marketplace for buying and selling books, live on Google Play and at purplebooks.in; built front-end and ran deployment operations.

TECHNICAL SKILLS

Frontend	React, React Native, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, PrimeReact
Backend	Python, FastAPI, Django REST Framework, REST APIs, Node.js fundamentals
Database	MongoDB, SQLite, SQL
Automation and CI/CD	Jenkins, Python automation, Ruby, test automation frameworks, TestRail, Git
Tools	GitHub, JIRA, P4V, Docker, VS Code, MongoDB Compass
Practices	Agile, software testing, API development and integration, project management

ACHIEVEMENTS

- ICU Achiever Award — recognized as a best employee at ICU Medical.
- Owned CI execution across multiple Plum Duo and Plum Solo software releases.
- Built reusable engineering automation tools and test framework enhancements.
- Managed a medical visualization prototype end to end.

EDUCATION

Master of Computer Applications (MCA)

College of Engineering Guindy (CEG), Anna University, Chennai

2019 – 2022 | Score: 84%

Languages: Tamil (proficient), English (professional working)
